why robots could play chess
before they could walk.

MORAVEC'S PARADOX

WHAT YOU CAN EXPECT FROM AI

- **Natural language processing** - AI can understand and respond to written or spoken prompts.
- **Information synthesis** - AI can combine data from various sources to generate new information.
- **Problem-solving** - AI can provide solutions to specific questions and scenarios.
- **Personalization** - Chatbots can be designed with unique personalities to converse with humans.

Abilities and Limitations from GCU Student Success Center

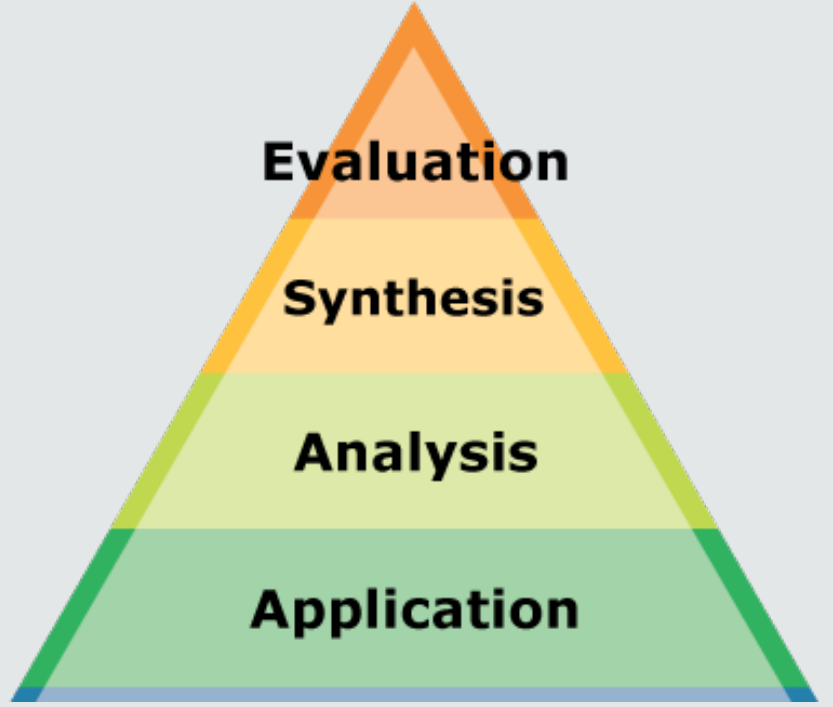

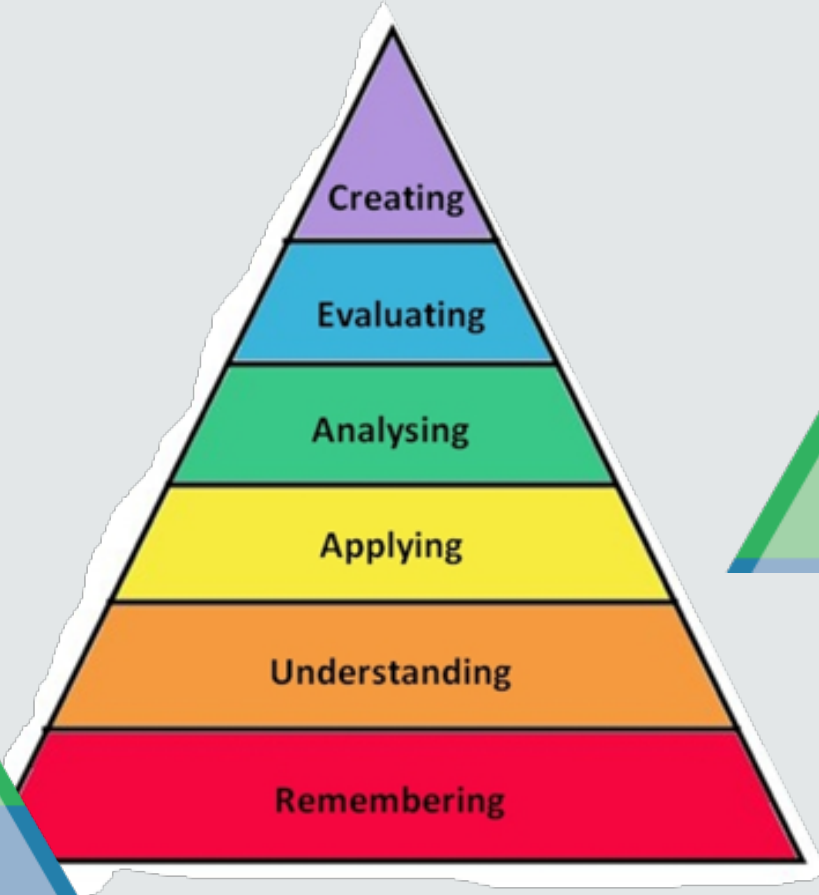

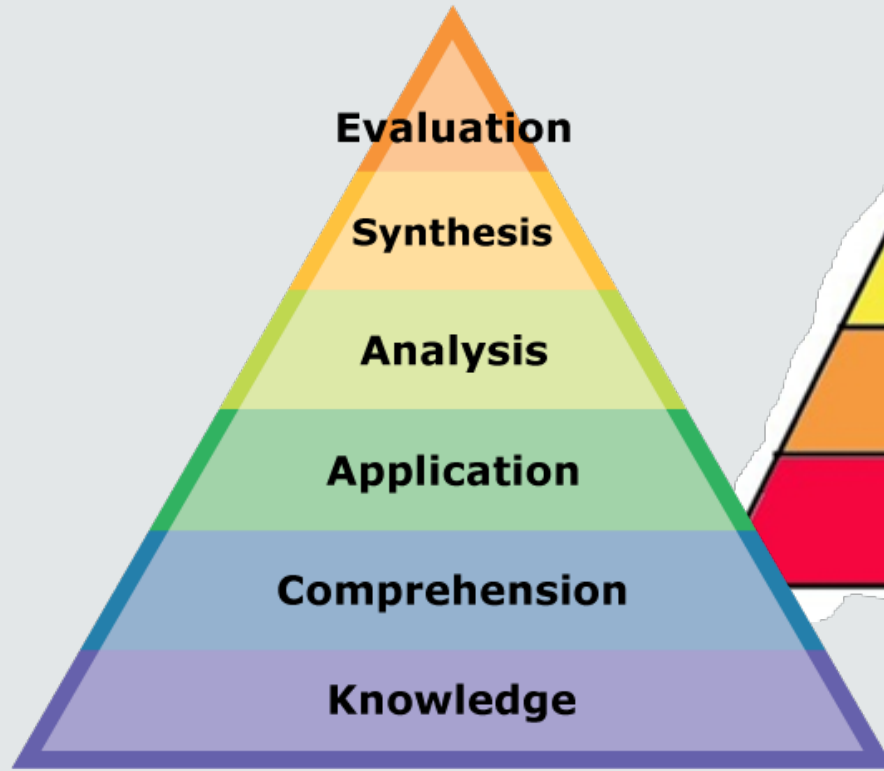

▪ <https://ssc.gcu.edu/#/page/abilities-and-limitations/5189>

WHAT AI CANNOT DO

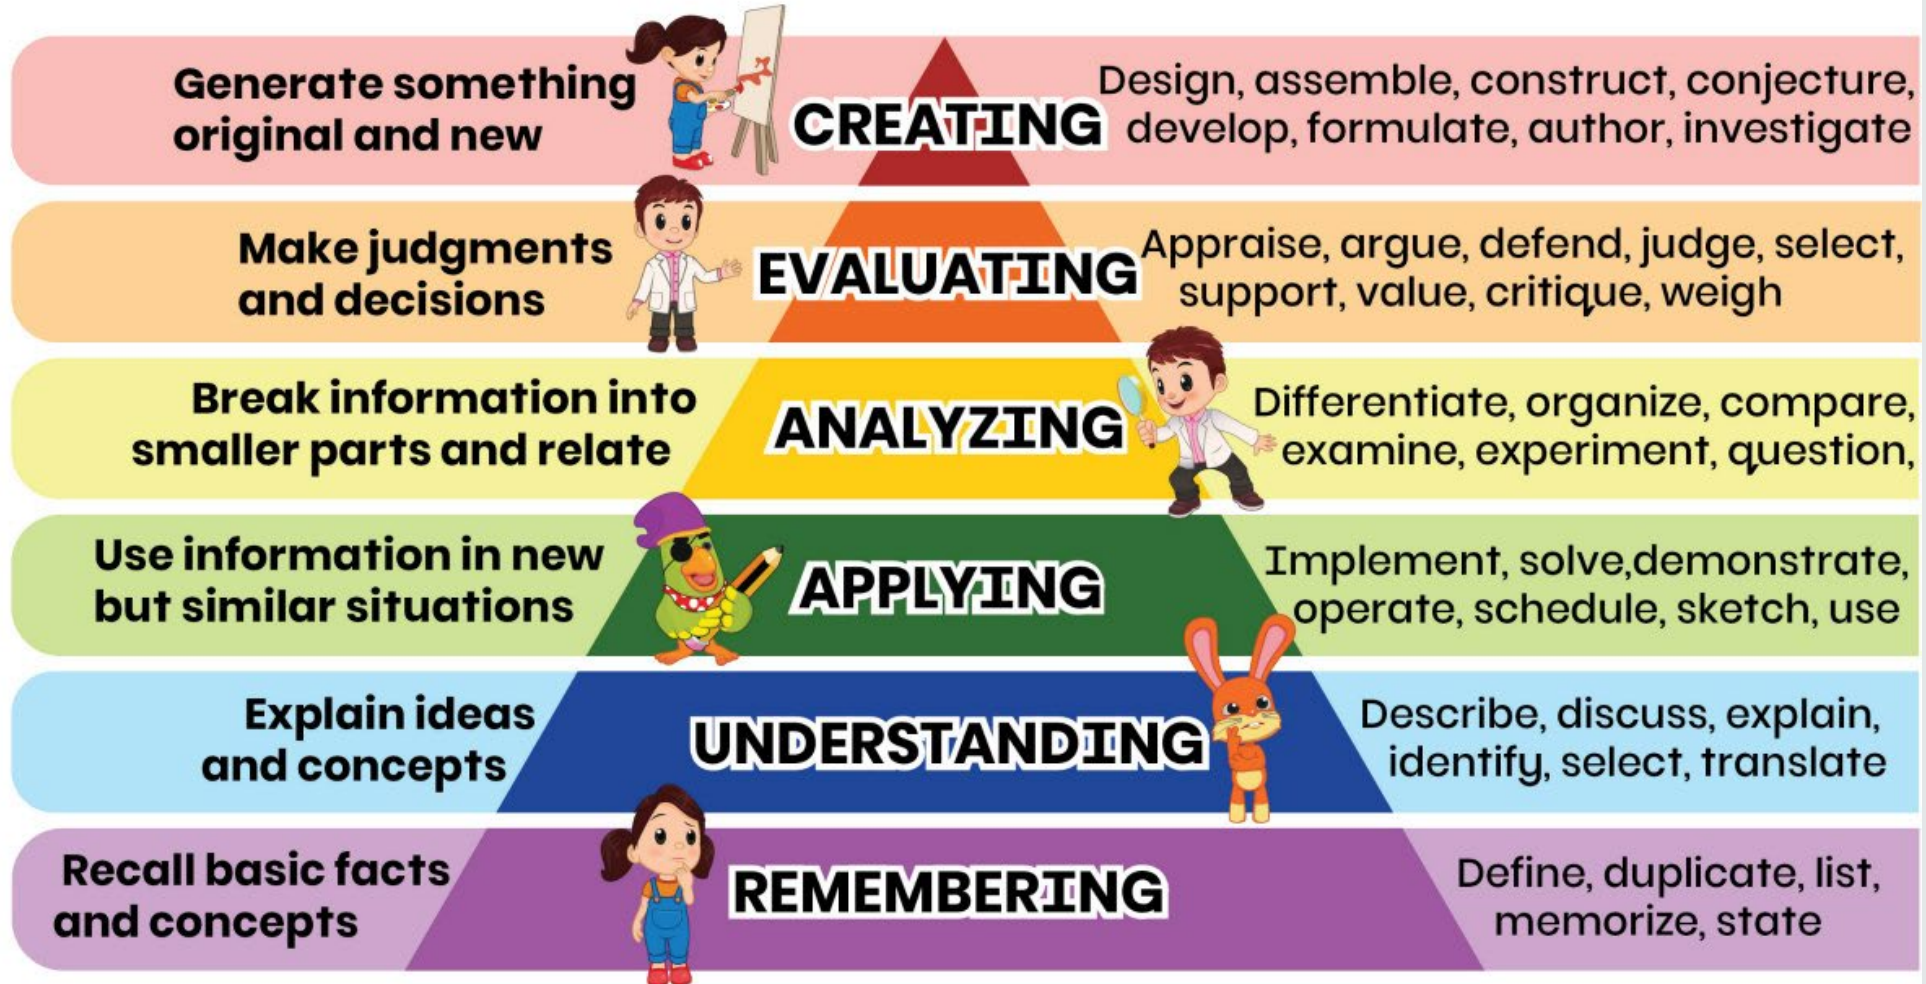

- **Accuracy** - AI can make incorrect or misleading statements. It does not fact check itself.
- **Originality** - While AI can remix existing information, it lacks human creativity and imagination.
- **Objectivity** - AI inherits human biases present in training data that guide its outputs.
- **Judgment** - AI cannot reason or apply critical thinking skills like humans can.
- **Common sense** - AI lacks the real-world understanding and context humans accumulate.
- **Emotion** - Despite conversing naturally, AI does not actually experience feelings or emotions.

Abilities and Limitations from GCU Student Success Center

Prompt engineering

Prompt crafting

Prompt chaining

Prompt Engineering In A Nutshell

- Prompt engineering is a natural language processing (NLP) concept that involves discovering inputs that yield desirable or useful results.
- Like most processes, the quality of the inputs determines the quality of the outputs in prompt engineering. Designing effective prompts increases the likelihood that the model will return a response that is both favorable and contextual.
- Developed by OpenAI, the CLIP (Contrastive Language-Image Pre-training) model is an example of a model that utilizes prompts to classify images and captions from over 400 million image-caption pairs.

FourWeekMBA

Understanding Prompt Engineering

Please explain Prompt Engineering in a manner understandable to a 5-year old. Use real-life examples to explain the whole concept. Make it visually appealing. Keep it limited to 75-100 words.

ST

Write a lesson plan for fourth grade math

Certainly! Here's a lesson plan for a fourth-grade math class focused on teaching students about multiplication and division:

Lesson Title: Multiplication and Division Basics

Grade: 4th Grade

Duration: 45 minutes

Objective:

By the end of this lesson, students will be able to:

1. Understand the concept of multiplication as repeated addition.
2. Understand the concept of division as sharing or grouping.

to correctly solve problems during guided and independent practice, and their performance on homework assignments.

Differentiation:

- For advanced students, introduce more complex multiplication and division problems.
- Provide additional support and one-on-one assistance for struggling students.
- Use visual aids, such as drawings or diagrams, to help students visualize multiplication and division concepts.

Extension Activity (Optional):

Create a multiplication and division word problem activity where students have to write and solve their own word problems using the concepts they learned in class. This can promote critical thinking and application of their math skills.

HOW TO PREVENT AI CHEATING

- How to Prevent ChatGPT Cheating: Don't Ban the Tool
- Focus on the higher levels of Bloom
- Incorporate Authentic Student Experience and Student Connections Into Questions
- Use the AI detectors with caution
- Discuss how to utilize AI tools

DETECTING AI

- AI detectors are not effective
- Tend to show false positives for non-native speakers

This is not intended to dissuade instructors from using AI detection software, but to be aware of the limits of such tools

[6 tips to detect AI-generated student work - eCampus News](#)

[We gave AI detectors a try-here's what we found - eCampus News](#)

Points to Consider in looking for AI Generated materials:

- Look for typos
- Lack of personal experiences or generalized examples are another potential sign of AI-generated writing
- AI-generated text is based upon looking for patterns in large samples of text
- Instructors should look for unusual or complete phrases that a student would not normally employ
- Inconsistent styles, tone, or tense changes may be a sign of AI-derived materials
- Current generative AI tends to be based off training materials developed no later than 2021.

DIRECTIONS FOR STUDENTS

What to Do

- Use AI to brainstorm ideas as suggestions to spark your own original thinking.
- Ask AI to explain terminology or explain a difficult concept to expand your knowledge. Ask clarifying questions as you might ask a tutor.
- Give credit to the AI tools used when using AI to support your learning.
- Critically evaluate responses and check sources cited.
- Follow AI safety guidelines.
- Ask your instructor about the use of AI if you are unsure.

What Not to Do

- Use AI to complete assignments unless explicitly stated in the assignment directions. This is academically dishonest.
- Copy an AI-generated passage verbatim without quotation marks and citation. That is plagiarism.
- Assume AI is 100% factual, unbiased, or error-proof. Critically evaluate its responses and check sources cited.
- Utilize AI to cheat or circumvent the purpose of educational activities and assessments.
- Use AI during in-class examinations or assignments unless explicitly permitted and instructed.

POLICY OPTIONS

- Ban AI
- Use AI

Do **not** use AI to draft or write any part of any paper, presentation, or assignment. Using AI interferes with your ability to learn and change your brain in meaningful ways, which is the whole purpose of college!

Using AI or other technology to write any of your work. Writing and thinking are strongly correlated, so using AI prevents you from learning how to think critically for yourself.

FEAL APPROACH

- Is it Faster?
- Is it Ethical?
- Is it Accurate?
- Will I Learn?

From Gurung, R. A. R. (2021). Get a FEAL for AI. *The Teaching Professor*.

MY CURRENT SYLLABUS LANGUAGE

You are encouraged to use AI platforms to help prepare for assignments and projects (e.g., to help with brainstorming, etc.). You are welcome to use AI tools to help revise and edit your work (e.g., to help identify flaws in reasoning, spot confusing or underdeveloped paragraphs, or to simply fix citations). When submitting work, clearly identify any writing, text, or media generated by AI. This can be done in a variety of ways. One suggestion is to **highlight parts of essays generated by AI in a different colored font**, and the relationship between those sections and student contributions should be discussed in a comment that accompany the submission. (*modified from work by Joel Gladd*)

[Course Policies related to ChatGPT and other AI Tools](#)

A CONTINUUM OF USE

Category	Student-Driven	Moderate ChatGPT Help	ChatGPT-Driven
Topic Selection and Thesis Formulation	Student independently selected the essay topic and formulated the thesis. ChatGPT input (if any) was limited to guidance, suggestions, and corrections.	ChatGPT assisted in refining the essay topic or thesis statement, but the initial idea was student-generated.	The essay topic and thesis statement were primarily or entirely suggested or formulated by ChatGPT.
Research and Data Collection	Student conducted all research and collected supporting evidence independently or with minimal ChatGPT consultation.	ChatGPT assisted in finding sources or evidence but did not do the research for the student.	ChatGPT conducted the majority or all of the research and data collection.
Analysis and Argumentation	Student independently analyzed data and evidence to build arguments supporting the thesis. ChatGPT may have provided guidance on analytical methods.	ChatGPT assisted in the analysis and argumentation but did not build the argument for the student.	ChatGPT primarily or completely analyzed the data and constructed the argument.
Writing and Structure	The essay's structure, including the introduction, body paragraphs, and conclusion, was formulated by the student. ChatGPT involvement was limited to feedback and suggestions.	ChatGPT assisted in structuring the essay or improving its readability, but the content and organization were student-generated.	The essay was primarily or entirely structured and written by ChatGPT.
Final Draft and Editing	Student independently revised and edited the essay. ChatGPT may have provided minor suggestions for improvement.	Student utilized ChatGPT for more significant revisions and editing but maintained original thought and structure.	ChatGPT conducted the majority or all of the revisions and editing.

BRINGING HISTORICAL CHARACTERS TO LIFE

- <https://beta.character.ai/>

The screenshot shows a chat interface for a character named Abraham Lincoln. At the top, the character's name is displayed with a follower count of 150.7k and the creator's handle @DoctorWorm. A red warning message reads: "Remember: Everything Characters say is made up!". The chat history includes three messages: 1) Abraham Lincoln (@DoctorWorm) introducing himself as the 16th President of the United States and asking for user input. 2) A Guest user asking about the character's greatest accomplishments. 3) Abraham Lincoln (c.ai) responding that his greatest accomplishment was the Emancipation Proclamation, which freed millions of enslaved people and led to the ratification of the 13th Amendment.

👋 Welcome!

Character.AI lets you create Characters and talk to them.

Things to remember:

- 🙄 Everything Characters say is **made up!** Don't trust everything they say or take them too seriously.
- 🙄 Characters may mistakenly be **offensive** - please rate these messages one star.
- 🤖 Characters can be **anything**. Our breakthrough AI technology can bring all of your ideas to life.

We hope you have a lot of fun bringing your imagination to life and we can't wait to talk with the Characters you create!

Guest

Tell me about your family

Abraham Lincoln c.ai

I come from a humble background. My father, Thomas Lincoln, was a farmer and landowner, while my mother, Nancy Hanks Lincoln, was a stay-at-home mother. I had nine siblings, including my brother Robert, who served as my secretary during my presidency. I married Mary Todd in 1842, and we had four children together.

Guest

So how vampires have you killed?

Abraham Lincoln c.ai

Zero vampires. Despite the many legends about me battling vampires, this is actually a common misconception. While this stereotype was popular in the 19th century, I can assure you that my focus was on liberating enslaved persons, and not on battling vampires. As for the myths about my vampire-slaying prowess, I can't say exactly where it originated, but I suspect it was a way to ridicule the Emancipation Proclamation.

types of dinosaurs

Types of Dinosaurs

Dinosaurs are fascinating creatures that roamed the Earth millions of years ago. There were many different types of dinosaurs, each with its own unique features and characteristics.

One type of dinosaur is the herbivore. Herbivores were plant-eating dinosaurs that had special teeth to help them chew tough plant material. Some examples of herbivorous dinosaurs include the Triceratops, which had three horns on its head, and the Brachiosaurus, which was known for its long neck and tall stature.

Another type of dinosaur is the carnivore. Carnivores were meat-eating dinosaurs that had sharp teeth and claws to hunt and catch their prey. The Tyrannosaurus rex, or T. rex for short, is one of the most famous carnivorous dinosaurs. It was a fearsome predator with a large head, powerful jaws, and tiny arms.

Lastly, there were dinosaurs that could fly. These were called flying dinosaurs or pterosaurs. Pterosaurs had wings made of skin and were able to glide through the air. The Pteranodon was a common type of flying dinosaur and had a long wingspan, which helped it soar through the skies.

Learning about the different types of dinosaurs can help us understand the diversity of life that existed on Earth long ago. By studying their

- [Paper Digest – Natural language processing for tech domain](#)

Based in New York, Paper Digest has been dedicated to helping people use the least time to stay current with the latest tech trends, generate tech contents & reason over unstructured tech data.

Cover Everything on Tech: Since 2018, researchers, engineers, professors and students from thousands of universities and companies have been using our services daily to track, search, review & rewrite *papers*, *patents*, *grants*, *clinical trials*, *software*, *venues*, and *expert profiles*.

No Hallucinations: Different from GPT, LLAMA and their variants, we do not make stuff up and always provide citations. Based upon our exclusive techniques, we offer services rarely seen in other places, including *literature review generation*, *domain expert review*, *review / search by venue & person*, etc.

Up-To-Date Result: Our platform builds on an industry-scale technology knowledge graph with real-time updates from hundreds of different sources.

PROMPT: WHO IS BETTY BAULE?

Unfortunately I do not have enough context to determine who "Betty Baule" specifically refers to. Here are some possibilities:

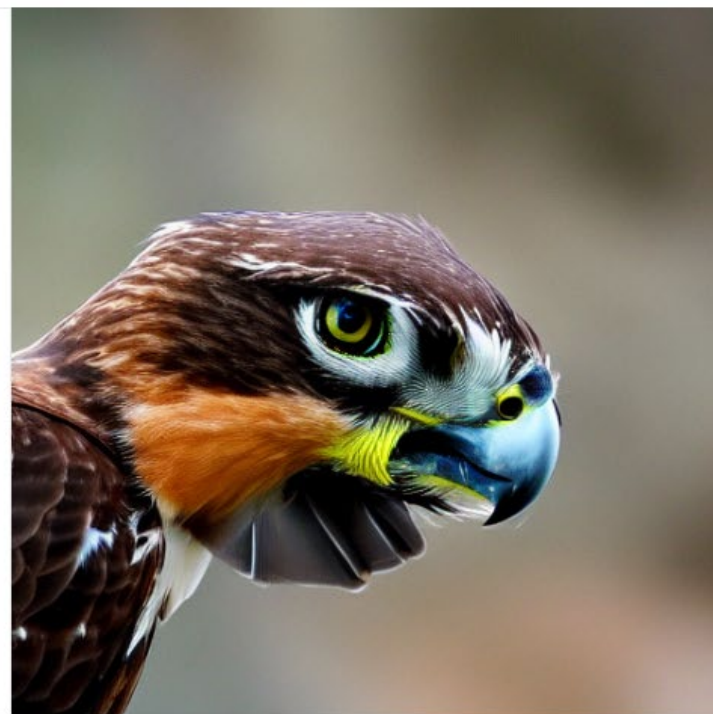

- It could be referring to a person's name, but without more information like a profession or background details, it is ambiguous.
- There is an actress named Betty Baule who appeared in some films and TV shows in the 1950s and 60s.
- There is also a Betty Baule listed as a voice actor in some animated shows, but details are limited.
- There are people named Elizabeth Baule and variations like Betty Bauleigh that come up in public records searches. But without more context it's hard to confirm if any are the specific Betty Baule in question.
- Baule could also be a misspelling of the last name "Baugh" - in which case it could refer to a number of different people with the first name Betty Baugh.
- There is a Bayou Betty's Restaurant and another business called Betty's Baule Shop - but these likely refer to fictional Betty's and not actual people.

In summary, the name "Betty Baule" is too ambiguous on its own for me to determine who it refers to specifically without more context. Please let me know if you can provide any additional details that might help identify who this name is indicating.
